TEMPLIN-BRADLEY'S WILT-RESISTANT ASTERS

A Field of Templin-Bradley's Wilt Resistant Asters

American Branching Wilt Resistant

The well known late branching type. 2½ to 3 ft. large double flowers produced in quantity. **Azure Blue, Crimson, Deep Rose, Purple, Sensation Scarlet, Shell Pink, White.** Any Color—⅓ oz. 25c; ¼ oz. 40c; Oz. \$1.20. Mixed Colors—⅓ oz. 20c; ¼ oz. 30c; Oz. \$1.00.

New—Little Giants Wilt Resistant

These new Little Giants are a distinct type of Asters. The plants grow 12 inches tall and form a perfect mound of flowers. Blooms are of the feathery Crego type, 4 to 5 inches across, and one plant will have 40 to 50 flowers showing at a time. Little Giants make the ideal bedding Aster.

Azure Fairy. Lavender. **Rosamond.** Rose pink. **White Mound.** Pure white. Any Variety. ⅓ oz. \$1.15; ¼ oz. \$2.15; Oz. \$6.75.

Early Giants Wilt Resistant

The flowers of this new type are of the large Giants of California form, while the plants are slightly shorter, about 1½ feet tall, of the branching type. The Early Giants are early blooming, coming into flower four to six weeks earlier than the standard Giants.

Light Blue. A very fine florist shade. Flowers large and on fine strong stems.

Peach Blossom. Flowers open white flushing as they advance to a lavender pink.

Rose Marie. Large well formed flowers of a rich rose pink.

Any Above—⅓ oz. 50c; ¼ oz. 90c; Oz. \$2.75.

New Princess Type

Blooms of this new type have full crested center surrounded by several rows of strong guard petals. Fine keepers and good shippers. Plants 24 inches tall, strong stemmed and free blooming. Flowers 3 inches in diameter, in mid August. A fine wilt-resistant variety for cloth-house.

Princess Anne. Beautiful peach blossom shade, delicate pink maturing to rose pink.

Princess Bonnie. Soft salmon rose shade with the centers rich gold while opening.

Princess Barbara. Beautiful soft orchid tones with delicate shadings.

Princess Elizabeth. Pure white.

Princess Golden Sheaf. Rich yellow.

Princess Margaret. True Aster-rose color.

Princess Marsha. Cinnabar scarlet.

Princess Susan. Clear true deep blue, without dark undertone.

Any variety—⅓ oz. 55c; ¼ oz. \$1.00; Oz. \$3.00

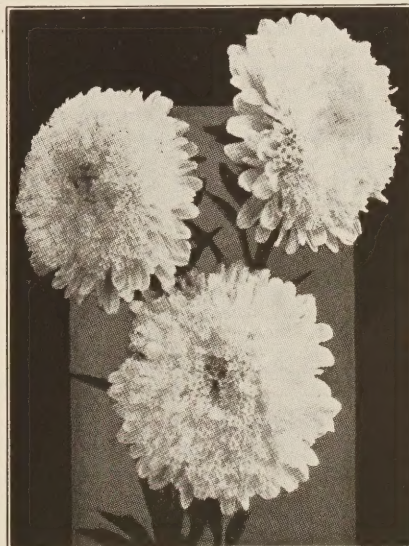

Early Royal Branching Wilt Resistant

A very desirable early market aster, closely following Queen of Market class. Produces larger and longer stemmed flowers than Queen of Market. Also a desirable class for early summer use under glass. **Azure Blue, Deep Rose, Peach Blossom, Scarlet, Purple, White, Any Color**—⅓ oz. 35c; ¼ oz. 60c; Oz. \$1.85. Mixed Colors—⅓ oz. 30c; ¼ oz. 55c; Oz. \$1.75.

Improved California Giants

The finest of all the asters. Their exceptionally large flowers and long strong stems make them extremely valuable on any market. Non-lateral. Late flowering.

Dark Purple, Light Blue, Loveliness, Deep Rose, Peach Blossom, White, Crimson. Any Color—⅓ oz. 50c; ¼ oz. 90c; Oz. \$2.75. Mixed Colors—⅓ oz. 40c; ¼ oz. 75c; Oz. \$2.25.

Asters, Princess Type

Separate Colors

Mixtures of all types in single color, will produce a continuous supply of bloom all season.

White Varieties Mixed. Very fine collection. **Pink Varieties Mixed.** From light pink to rose. **Blue Varieties Mixed.** Light to mid-blue shades. **Red Varieties Mixed.** Fine mixture of bright red shades. **Any above**—⅓ oz. 30c; ¼ oz. 55c; Oz. \$1.75.

Queen of the Market Wilt Resistant

The standard early aster, 18 inches, branching, good sized all double flowers. The most desirable for bedding plant sales. **Crimson, Dark Blue, Light Blue, Scarlet, White, Peach Blossom, Flesh Pink.** Any Color or Mixed—⅓ oz. 30c; ¼ oz. 55c; Oz. \$1.75.

Improved Crego Asters Wilt Resistant

Of robust branching type about 2½ feet tall flowers large double and well formed, one of the finest varieties for all purposes, blooms in mid-September. **Azure Blue, Blue Flame, Shell Pink, Deep Rose, Cattleya, Crimson, Dark Violet, White.** Any Color or Mixed—⅓ oz. 30c; ¼ oz. 55c; Oz. \$1.75.

Super-Giant El Monte

A new introduction in the giant flowering class, particularly desirable on account of its early blooming habit and color. It is a deep glowing crimson, fully double, extremely large, basal branching and strictly non-lateral. ⅓ oz. 55c; ¼ oz. \$1.00; Oz. \$3.00.

Super Giant Los Angeles

The first of a new super giant race. The flowers are pure shell pink in color, extremely large and full petalled. ⅓ oz. 55c; ¼ oz. \$1.00; Oz. \$3.00.

Super Giant Santa Maria

Largest and most fully double Aster. Santa Maria produces flowers over 6 inches across. Long lacey white petals curling from an interlaced powdery center, on stout 2½ foot stems branching from the base. ⅓ oz. 75c; ¼ oz. \$1.40; Oz. \$4.20.

Improved Ball Type Asters Wilt Resistant

An unusually fine type well adapted to use by the commercial cut-flower grower. Flower heads are of fine form compact and of good substance and keeping qualities.

Ball type Asters are early, blooming in mid-August. The plants are 2½ feet tall. We offer this type in the following colors:

Ball's Deep Rose. **Ball's Phlox Pink.**
Ball's Purple. **Ball's Early White.**
Ball's Late White (Mid-September)

Prices on Any Above: ⅓ oz. 30c; ¼ oz. 55c; Oz. \$1.75.

Marigold Dwarf Harmony

African "Alldouble" Type

It has been generally considered that any strain of African Marigold that would come 60% double was excellent. This new strain identical with Orange Prince in form is coming practically 100% double, having proved out that way over several year's trial.

Orange Alldouble. Same color as Orange Prince, but practically 100% double.

Lemon Alldouble. Same as Orange except in color. Large lemon colored balls.

Price either above— $\frac{1}{4}$ oz. 50c; $\frac{1}{2}$ oz. 90c; Oz. \$1.60.

Orange Prince

Improved Strain. The orange strain of the Tall Double African Fistulosa. The finest of all Marigolds for cutting, and exceeded in doubleness only by the All double strains.

Lemon Queen

Improved Strain. An exact counterpart of Orange Prince except for color. We are also offering the Improved Strain of this Variety.

Price either above— $\frac{1}{4}$ oz. 50c; $\frac{1}{2}$ oz. 90c; Oz. \$1.60.

Mission Giant Marigolds

Of medium height with giant chrysanthemum blooms the plants grow 18 inches tall and branch from the base producing 8 to 12 stems of excellent cutting length.

Goldsmith. The rich golden orange color so much in demand is of great depth and richness in Goldsmith. $\frac{1}{8}$ oz. 35c; $\frac{1}{4}$ oz. 60c; Oz. \$2.00.

Limestone. Beautiful chrysanthemum-type flowers of Mission Giant habit of growth, bloom, size and season. It is of soft yellow, comparable in color to Lemon Queen. Limestone completes the color range of these Mission Giants. $\frac{1}{8}$ oz. 60c; $\frac{1}{4}$ oz. \$1.10; Oz. \$3.50.

Yellowstone. A lovely clear golden yellow companion to Goldsmith which we offered last year and which became immediately popular. Of the same fine plant characteristics equally free blooming and valuable as a cut flower. $\frac{1}{8}$ oz. 35c; $\frac{1}{4}$ oz. 60c; Oz. \$2.00.

TEMPLIN-BRADLEY'S ANNUALS

PRIMULAS

New Giant Malacoides

The plants of this new strong robust growing variety make excellent pot plants, with extremely large, well formed, rounded flowers produced in abundance on heavy, wiry stems rising from rich green foliage. The plants are superb specimens with their large bright colored showy flowers, having often thirty or more spikes.

Giant Double Fairy Jewels. Very productive of its large double flowers, $\frac{3}{4}$ to 1 inch in diameter, the color is a lively rich rose pink slightly deeper in the center than the outer or older petals. Crested center of 2 or 3 extra rows of petals appearing at first as a tuft in the center of the flower but later lying flat in double rows. **Tr. Pkt. \$1.50.**

Giant Enchantress. A beautiful soft salmon-rose, hitherto unknown to the Malacoides Primulas. The beautifully formed flowers are well rounded, $\frac{7}{8}$ to 1 inch in diameter and produced in unbelievable profusion. **Tr. Pkt. \$1.50.**

Giant Snow Flake. Beautifully formed 1 inch florets of purest shimmering snow white adorn the stately stems like glistening jewels sharply high-lighted by the lush green foliage. **Tr. Pkt. \$1.00.**

Giant Lavender Glory. Soft mauve lavender about the shade of the original Malacoides. Lavender Glory has the largest flowers of this group—up to $1\frac{1}{4}$ inches in diameter, beautifully formed and abundantly produced. Plants are much stronger and more robust than the original type. **Tr. Pkt. \$1.00.**

Giant Malacoides Mixed. The mixture will contain all of the above single varieties and many other delightful shades and colors not yet produced as separate colors. **Tr. Pkt. \$1.00.**

Primula, Chinensis

Some very fine varieties of this Primula type are coming to the front at this time.

The Dazzler. This beautiful large flowered variety is of rich brilliant orange-scarlet with flower petals delightfully fringed and fimbriated. Its truly dazzling flowers are well above the fine foliage which is quite compact making a most attractive and salable plant. **Tr. Pkt. \$1.00.**

Tetra Snaps For Outdoor Planting

These Tetra Snaps are unquestionably the finest outdoor Snapdragon today. Flowers are huge, mostly ruffled, in mixed colors that cover the full range, with many flowers richly veined. Blooming size plants are tall, but with finger-thick stems that keep the spikes erect and the tips straight.

Tr. Pkt. 75c.

Outdoor Strains

Rust-Proof Maximum Types

Loveliness. A beautiful, soft rose pink Alaska. Pure white, base-branching.

Copper King. Shades of copper, from a coppery old gold to the deep copper orange.

Crimson. A fiery crimson. Individual flowers unusually large. An excellent variety.

Apple Blossom. Rosy pink with white tube.

Campfire. A new color in snaps. A pure dazzling scarlet free from orange tinge.

Canary Bird. Canary yellow identical with non-resistant variety in size and color.

Christmas Candle. A bright flame color bloom with a waxy cream tube.

Indian Summer. Brilliant coppery orange scarlet. Large flowers and strong stems. A fine variety.

Swing Time. The loveliest Snapdragon we have ever seen. A bright rose pink with white tube and yellow blotch on lip.

Red Cross. A bright scarlet-red of very velvety texture, small yellow spot on lip. Slightly shorter in growth than others but with same large individual blooms.

Paradise Rose. A soft delightful rose pink. Of fine flower form with larger and longer spikes. Unsurpassed among rose pinks.

Yellow Giant. Deep rich yellow. Very striking and attractive.

Price any color or mixed: 1/8 oz. 40c; 1/4 oz. 75c; Oz. \$2.75.

Rust-Proof Majus Types

The Majus Grandiflorum class produce fine spikes of flowers 8 to 10 inches in length on plants which average 2 to 2 1/2 feet in height. The individual flowers are of the Grandiflorum or large flowered type.

Autumn Glow. Beautiful old rose suffused amber and with a rich golden lip which adds a most pleasing color blend.

Brilliant Rose. The true rose pink tone of a marvelous richness and brilliancy.

Harmony. A beautiful blending of terra cotta and yellow with a delicate shading of rose.

Padre. Rich velvety crimson of much depth and brilliancy. A most attractive color.

Shasta. Pure white of a soft velvety texture producing beautiful large spikes of well placed florets.

Price any color or Mixed: 1/32 oz. 45c; 1/16 oz. 75c; 1/4 oz. \$1.50.

Rust-Proof Majestic Types

We highly recommend this class for bedding plants. The blooms are as large as the Maximum type but do not grow as tall and, therefore, do not require supports.

Mixed Colors Only. 1/8 oz. 40c; 1/4 oz. 75c; Oz. \$2.75.

TEMPLIN-BRADLEY'S FLORIST'S STOCKS

Non-Branching Column Double Giant Excelsior

This group is indeed very popular because of their single-stemmed habit, and we list the choicest varieties, which will produce an extremely high percentage of doubles. Each plant produces a large flowered, long spike, blooming a few days earlier than the Bismarcks. Should be planted close.

Dark Blue. Tall vigorous plants. New color.

Apricot No. 20. An ivory apricot of vigorous growth. A good florist shade.

Chamois Pink. A beautiful and popular color and generally in good demand.

Moonlight. A very good shade of delicate yellow that meets a good sale.

Ruby. A rich wine-red. Strictly non-branching.

Gardenia. Immense double glistening white flowers on long spikes.

Malmaison Pink. A pleasing shade of light pink.

Rose Pink. (New) The color that is so popular among florists, but which has not previously been available in the non-branching type. Clear rose pink flowers, large and in long spikes.

White Improved No. 16. Tall plants. Pure white blooms well doubled.

Silvery Lilac. (Lavender). Clear lavender. Gives high percentage of doubles and distinctly single stemmed.

Illusion. A bright lively scarlet red that will be extremely useful in making up mixed bouquets adding just the needed color.

Ball's White. A good white under glass but shows a suffusion of pink in the average light and under artificial light.

Deep Rose. Brilliant deep rose. Very fine heavy spikes with closely spaced florets.

Pure White. A grand pure white with glistening flowers.

Mixed Colors—All above shades. Price, any color or mixed—Trade Pkt. \$1.00; ¼ oz. \$2.50; ½ oz. \$4.75; Oz. \$9.00.

Non-Branching or Column Stocks

Giants of California Stocks

Florists who demand the best in Stocks are now planting the Giants of California varieties.

This magnificent group comes very early having the branching habit of the Bismarck with mammoth flowers on longer stems; on this account it is a great improvement over all forcing stocks. We can with confidence recommend it to the florist grower; its branching habit lends itself admirably for bedding work and it comes with a high percentage of double plants, thirty-four inches tall.

Red Woods, Blood red. Rich strong color tones that are more and more in demand.

Pacific, Blue. A color that sells readily when seen, and one that is sure to become popular.

Santa Barbara, Chamois. A lovely color that should be more widely grown.

Tahoe, Lavender. Equal in color tones to any of the lavender stocks. Highly praised.

Monterey, Pink. A rich glistening shade of pink that combines well with any color.

Mojave. A rich velvety purple or Elk's Pride color. A valuable addition to this class.

Yosemite, Rose. A deep rich shade with a great amount of flower substance.

Santa Marie, White. A very excellent pure white of marvelous flower substance and form.

Golden Gate, Yellow. One of the best yellows, delicate enough to be in good demand.

Sequoia, Rose carmine. A rich sparkling color that is always popular with the florist.

Mixed Colors.
Any above—¼ oz. \$1.50; ½ oz. \$2.75; Oz. \$4.25.

Ten Weeks Stocks Dwarf Double Flowering

The dwarf double ten weeks are in great demand among plant growers who find this to be the most satisfactory for plants in flats for the out-door bedding plant trade. They include a marvelous range of colors.

All Colors Mixed—½ oz. 40c; ¼ oz. 65c; ½ oz. 95c; Oz. \$1.75.

Improved Bismarcks Double Giant Imperials

The earliest and most popular type for the florist. Our strain has been carefully selected to produce a high percentage of double flowers. The Bismarcks are of the branching habit, the spikes are large, and appear in a splendid variety of colors. Seed sown in July or early August will produce flowers in December, with normal amount of sun.

They can be planted close and they will make only one main spike with comparatively no side branches and thus answer the purpose of the need for the tall single spike or thinned out to produce more branching growth if so desired.

Buttercup. New deep yellow.

Canary Yellow. (Golden Ball) A clear ivory yellow.

Chamois. Ivory and old rose. Very popular.

Elk's Pride. A beautiful royal purple.

Fiery Blood Red. A dazzling red.

Flesh Pink. Delicate pink.

Golden Rose. A light rose, gold centers.

Lavender. Standard color.

Lilac. A lilac-blue.

Old Rose. A beautiful shade of old rose.

Rose. Deep rose pink.

Shasta. Best white. New.

Choice Mixed. Mixture of all above varieties.

Price, any above—¼ oz. 35c; ½ oz. 60c; ¾ oz. \$1.25; 1 oz. \$2.35; Oz. \$3.75.

Statice, Annual

Sinuata. An excellent everlasting flower for winter bouquets. Also fine cut flowers for trimming. Supplied in separate colors:

True Blue. The best real blue.

Rosea. Fine rich rosy purple.

White. A free blooming pure white.

Lavender. New, clear bright lavender.

Any color: ¼ oz. 15c; Oz. 35c; ¼ lb. \$1.15.

Mixed—¼ oz. 15c; Oz. 35c; ¼ lb. \$1.15.

Bonduelli. A free blooming variety producing golden yellow flowers. ¼ oz. 15c; Oz. 35c; ¼ lb. \$1.15.

California Giant, "Daffodil" Zinnia

Profitable Cut Flowers

Our sales on Zinnias have shown a remarkable increase over the past two years, indicating, we believe, that more florists are using them for outdoor cut flowers and as a bench crop item under glass during the early spring months.

Consecutive sowings of the Dahlia Flowered, California Giant and the Dwarf Double or Pumila Elegans types in the field, produce an abundance of cut flower material for which there has been a good market.

The Dahlia Flowered or California Giant types do splendidly under glass during the early Spring months. The plants are set close in the benches and grown one flower to each stem.

California Giant Zinnias

A newly developed type which carries the same robust habit as the Dahlia Flowered type. When the flowers are half grown they make a very useful florists cut flower and when in full bloom they reach enormous size with a flatness that gives them a more graceful appearance than the giants of the conical form.

Brightness. Bright but deep pink, a Florist's shade.

Cerise Queen. A beautiful cerise rose very bright and striking. Good florists shade.

Cherry Queen. Brilliant cherry rose. Bright and colorful.

WOOD PLANT BANDS

*Do A Better Job of Growing Plants
Than Clay Pots Do*

EASILY SET UP. Bands come to you packed flat. Each band is scored for easy folding and the ends are slotted as shown in the cut. When folded and these slots interlocked the band is held firmly together and in shape. We have seen no other bands that can be set up so easily and rapidly and that hold their shape so well until filled as do these bands. No stapling or tacking is necessary.

BETTER FOR THE PLANT. Because of the accurate cutting of these bands and their shapeliness they fit snugly together in the flats or on the bench and maintain a uniform moisture condition that is impossible with clay pots. Even when spaced on the bench they do not dry out as rapidly as clay pots. The added amount of soil in the band over the amount in an equal sized round pot gives the plants much more root area and promotes a greater development.

MAKE MORE SATISFIED CUSTOMERS. When in bands the plants reach the buyers home in much better condition because the outside roots are not dried out and dead. They can be moistened by the buyer before setting without washing the soil from the roots. The bands are simply unwrapped from the plant and the plants set into the garden without any check in their growth.

VERMICULITE Agri-Lite Brand

Agri-Lite Vermiculite is specially refined for horticultural uses. It is sterile, contains no weed seeds, no harmful properties. It is clean, dust-free, odorless and easy to use. It weighs only 6 pounds per cubic foot. Agri-Lite is manufactured from a rare form of mica, exploded under intense heat.

Experimentation has proven Agri-Lite to be the best material for rooting cuttings. Not only is better rooting obtained but they emerge from three days to three weeks sooner, thus shortening the length of time they remain in the bench.

Seeds planted in Agri-Lite germinate more promptly and in better percentage, they are not as susceptible to damping-off and they produce a better root system earlier.

Agri-Lite is packed in 2 bu. bags. 1 to 10 Bags, \$1.20 each; 10 Bags and up \$1.15 each; F. O. B. our Warehouse.

Flaring Rose Sprinkler

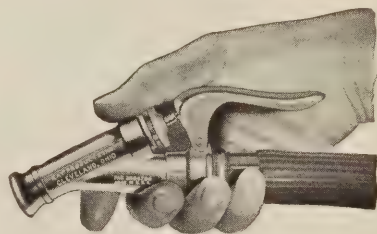

This fan shaped sprinkler is much preferred by many florists for bench watering. Delivers large volume of water evenly without excessive pressure. Especially adapted for flowers and delicate foliage. Each \$1.00.

Snap-tite Hose Coupler

Snap-tite couplers greatly simplify the use of garden hose in the greenhouse or field. A nipple is attached to each faucet and a coupler to the hose. The swivel ball-bearing construction prevents hose kinking and is simply snapped on or off when transferring from faucet to faucet. Remains water tight and prolongs the life of the hose. Complete coupler \$1.35; Extra faucet nipples 50c each.

Lever-Spray Nozzle

The Lever-Spray Nozzle fits the hand naturally and the very slightest pressure regulates the degree of spray desired. Release of the lever completely shuts off the flow. Heavily nickel-plated. Each \$1.69.

FOR "DAMPING OFF" AND SOIL STERILIZATION

HAMMOND'S FORMACIDE Formaldehyde Dust

Formacide is the most practical, economical and easy-to-use of all soil sterilization agents. This concentrated stabilized, perfectly blended material is adjusted to release sterilizing gasses of Formaldehyde at the proper rate to completely destroy fungi diseases which cause Damping-Off. Also this reaction promotes a slight alkaline nature in the soil, thus stimulating the growth of the seedlings.

Use 1½ oz. of Formacide per square foot of soil in beds, benches or flats 3 inches deep or mix 8 ozs. of Formacide with each bushel of soil for use in pots or flats. 1 Lb. 85c; 5 Lbs. \$2.50; 25 Lbs. \$10.00.

Formaldehyde Liquid 40%

A simple and effective soil treatment for the control of Damping-Off in flower and vegetable seedlings. Also effective in the control of nematodes and other bacterial and fungous diseases. 1 Lb. 60c; 5 Lbs. \$2.50; 60 Lb. Drum \$9.90.

Nico-Fume

Nico-Fume powder in the pressure fumigators, guaranteed to contain not less than 14% nicotine expressed as alkaloid—is burned under pressure in the improved can in which it is packed, giving more uniform pressure for better control of certain insects.

The recommended method consists of placing pressure-fumigator cans on walks, spaced so as to furnish equal distribution of fumes. Under average conditions, a 1 lb. can will fumigate about 25,000 cubic feet; the ½ lb. can about 12,500 cubic feet. Full directions on cans.

1 lb. cans 75c each; 6 for \$4.15; 12 for \$7.95.
½ lb. cans 45c each; 6 for \$2.50; 12 for \$4.60.

Nico-Fume Holders

Especially designed for use in carrying out the hand-directed method of fumigation. Each \$1.75; 3 for \$5.10.

Hammond's Weed Killer

Weeds, Poison Ivy and all vegetation are quickly and easily destroyed with this highly concentrated and easy to use material. Mix with water 1 part to 40, and apply with sprinkling can and all vegetation is killed. A few rains wash the ground clean of any toxic condition and it is ready to plant again. Quart 64c; Gal. \$1.67; 5 Gal. \$7.67; 30 Gal. \$27.90.

Martindale Protective Mask

These mask respirators are very helpful to the operation when dusting or spraying in the greenhouse. Also useful when working with dry soil, fertilizers or other dusty materials that are irritating to inhale. Mask is of aluminum with felt pads. Each 35c; Felt re-fills, Standard 25c per doz., Heavy 35c per doz.

Grafting Wax

A very high grade wax for grafting, budding or repairing broken branches. Seals thoroughly, promoting quick union of grafts or buds. ½ lb. 35c; 1 lb. 55c; 5 lbs. \$2.50.

ROOTONE

Reg. U. S. Pat. Off.

A hormone powder for use on cuttings to stimulate root formation. May also be used on seed or bulbs to stimulate quicker and more vigorous root growth. Just dust on the cutting, seed or bulb and plant. 2 oz. \$1.00; 1 lb. \$5.00.

TRANSPLANTONE

Reg. U. S. Pat. Off.

A combination of plant hormones, plant vitamins and other growth substances. Water plants with Transplantone solution when transplanting and at later intervals to stimulate greater and more vigorous growth. 3 oz. \$1.00; 1 lb. \$4.00.

FRUITONE

REG. U. S. PAT. OFF.

A powder containing several plant hormones which, when applied as a spray, will help develop a better set and a larger crop on tomatoes. Also used to develop seedless fruit. 2 oz. \$1.00.

Benzo-Fume

Benzo-Fume Pressure Fumigators are the efficient and economical method of controlling greenhouse red spiders. Prompt dispersion of the fumes under pressure generated by the specially compounded powder (guaranteed to contain not less than 17½% of azobenzene) insures a uniformly effective concentration throughout the greenhouse. No other means of using Azobenzene, at standard dosages, has been found more effective than the Benzo-Fume method.

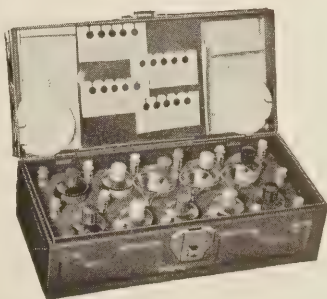

This method consists of placing Benzo-Fume Pressure Fumigator cans on walks, spaced so as to furnish equal distribution of fumes. Under average conditions, a 1 lb. can will fumigate about 10,000 cubic feet. Benzo-Fume Fumigators are also adapted to hand-directed fumigation and can be used in the standard Nico-Fume Holders. Full directions are furnished with Benzo-Fume for its effective use.

1 lb. cans 50c each; 6 for \$2.90; 12 (1 case) for \$5.50.

½ lb. cans 30c each; 6 for \$1.70; 12 (1 case) for \$3.20.

DuPont Lawn Weed Killer

This new 2-4-D weed killer makes it possible to have a beautiful weed free lawn. DuPont Lawn Weed Killer kills all the large, leafy weeds but does not harm the common lawn grasses. Used according to directions, one treatment will destroy practically all weeds in your lawn. 8 oz. will treat 1600 square feet when diluted. 8 oz. \$1.00; Quart \$2.98.

HORMODIN POWDER

Hormodin Powder contains the hormone-like plant growth substance that stimulates rapid root growth on cuttings, making it possible to propagate practically all varieties of plants from cuttings. Because Hormodin Powder induces roots to grow even from tissue which does not normally produce roots, cuttings may be taken with less regard to buds or nodes. Cuttings treated with Hormodin Powder root quicker and have more growing roots per cutting.

Hormodin Prices

Powder No. 1. For use on carnations, chrysanthemums, poinsettias, roses and similar types. 1¼ oz. can 50c; 1 lb. \$3.00.

Powder No. 2. For use on less sensitive species, which comprise many of the semi-woody types and many of the common shrubs. 1¾ oz. can 75c.

Powder No. 3. For use with the more resistant species which comprise most evergreens and dormant leafless cuttings. 1 oz. can \$1.00; ½ lb. \$4.50.

Cyanogas G

The positive Fumigant for pest control in Greenhouses, Mushroom Houses, Warehouses and Mills.

Greenhouse fumigation is accomplished by scattering the Cyanogas on walks throughout the greenhouse. The moisture absorption releasing the gas which being slightly lighter than air, rises and when in tightly closed area permeates every nook and corner.

The standard dosage for most plants is ¼ oz. Cyanogas G per 1000 cubic feet of greenhouse space. More Cyanogas is required if the houses are leaky, relatively less when houses are tight.

Cyanogas fumes are poison and care must be exercised that operators do not inhale. Full directions for use and application are printed on the container and should be followed carefully. 5 lb. can \$3.75; 25 lb. can \$12.50; 100 lb. drum \$30.00.
